

GYNO-BALANCE

VAGINAL PH REGULATOR

MEDICAL DEVICE

ALREADY
ASSESED

DESCRIPTION

Non – hormonal vaginal gel specially formulated to **restore physiological vaginal pH** and **balance its bacterial flora**.

Indicated in case of **bacterial vaginosis, vaginitis and vaginal mycosis**. It prevents relapses, especially following antibiotics treatments.

The vaginal pH is an important factor for a healthy vaginal mucosa, where the acid environment is maintained by lactobacillary flora producing lactic acid. This acid environment protects from undesired colonization and infections while its alkalisation causes malodorous discharges and consequent discomfort.

Gyno-Balance rebalances the vaginal flora, **reducing the growth of bad bacteria in favor of the good ones** (Lactobacillus) and restoring the physiological environment. It is enriched with agents acting as **prebiotics**, as they are able to foster the growth of Lactobacilli strains and not that of other pathogenic microorganisms of the vaginal flora.

REGULATORY STATUS

Class IIA.

INDICATION

- Treatment and prevention of bacterial vaginosis
- Prevention of bacterial vaginosis and vaginal mycosis relapses
- Suitable in association with antibiotic therapy
- Suitable for menopausal and peri menopausal women, and for young adult females as well

CLAIMS

- Against irritations, itching, unpleasant smells
- Enriched with prebiotic
- Contributes to restore vaginal pH and flora balance
- Delicate formulation
- Indicated in treatment of bacterial vaginosis
- Adjuvant for vaginitis and vaginal mycosis following antibiotics treatment.
- It prevents relapses
- Condom compatible

INGREDIENTS

- **Lactic Acid and Sodium Lactate:** able to lower and maintain the correct acid pH of the vaginal epithelium, protecting it from unwanted colonization and infections.
- **Fructooligosaccharides (FOS):** moisturizing and also acting as prebiotics, being able to foster the development of strains of lactobacilli and not others pathogenic microorganisms of the vaginal flora, promoting the physiologic acidic pH environment.
- **P-Anisic acid, Levulinic acid:** preservatives - non-preservatives of natural origin with strong bactericidal activity.

ASPECT

Available in 2 formats:

- multidose 40 ml tube with canula
- 5 ml single-dose vials (pack with 7 units).

APPLICATION

Use a single dose per day, every morning or every night, for 7 days.
